Weekly, per six months	5.00
Weekly, per year	9.00

The New Mexican is the oldest newspaper in New Mexico. It is sent to every Postoffice in the Territory and has a large and growing circulation among the intelligent and progressive people of the southwest.

## ADVERTISING RATES.

Wanted. One cent a word each insertion. Local. Ten cents per line each insertion. Reading local. Preferred position. Twenty-five cents per line each insertion. Displayed. Two dollars an inch, single column, per month in Daily. One dollar an inch, single column, in either English or Spanish Weekly. Additional prices and particulars given on receipt of copy of matter to be inserted.

FRIDAY APRIL 15.

The people of Cuba, of right, ought to be free. Eminent correct this.

PRESIDENT MCKINLEY evidently understands what it means to be managing editor of a war.

THE 45 states and the three territories are united upon one thing, and that is that Spain's iron heel must come off Cuba's neck.

SPAIN must let go of Cuba. The time has come for this. And if war is necessary why, then war must come. This is manifest destiny.

MANY United States senators are never happy unless they can do a good deal of talking, vide their talk on the Cuban resolutions pending in that body.

A CANNING factory and evaporating establishment in this city can be located here with a comparatively small capital and would prove a paying venture from the very first.

MR. DEWOLF HOPPER has been divorced again. Getting married and getting divorced seems to take up more of Mr. Hopper's time than do the duties connected with his theatrical profession.

THERE is one thing that is very apparent in the investigation now going on in Las Cruces against the Fountain murderers, and that is that Sheriff Pat Garrett of Dona Ana county can't be scared.

IN case of a call for 50,000 volunteers to serve in war with Spain, this territory will only have a chance to furnish 130 men, which means much disappointment in territorial military circles. Ten times the number of men would gladly be furnished by New Mexico, armed and equipped and ready for service, within 20 days.

THE several correspondents of and also our esteemed neighbor in Las Vegas are still worrying a good deal about this journal and its editor; to be sure, they have good cause; too much interference with nefarious hooligan schemes, that are going on in Las Vegas in official circles, does not suit them. Of course not. Publicity is a bad thing in such cases.

IN the midst of this war excitement it must not be forgotten, that Santa Fe ought to have a fruit cannery and evaporating establishment. Human beings are so constituted that they must eat, war or no war. Fruit, jams, jellies, dried fruit and the like prepared right here would feed a good many people by giving them profitable employment. Let us have a fruit cannery.

A BEET sugar factory is a necessity of the future. But that requires large capital, which must come from outside. An establishment to preserve our fruit, etc., by canning and evaporating is within the means of the town itself. Let us make that a success and the greater project will follow. Let everyone help at least by the encouragement of their presence at the public meeting tonight.

THE sheep raisers and wool growers of New Mexico must remember that the present tariff law, enacted under a Republican administration and by a Republican house of representatives, has put many thousands of dollars into their pockets during the year 1897 and will do so again this year of grace 1898. Therefore should this important class of New Mexico citizens vote the Republican ticket in the coming November elections. It should be borne in mind in this connection, that the consumers of woolen goods are not experiencing any hardships from an increase in prices, as there has been no material advance in the cost of such goods.

THE revenue law of this territory provides that the personal property of residents shall be assessed in the county in which the owner of the same has his residence, and not otherwise. This, of course, covers cattle, sheep, horses and other animals, which are to be assessed to the owner where he lives, on the 1st of March, and not in the county where they may be situated. Non-resident owners of stock have to pay taxes upon their animals in the county where they may be pasturing on the 1st day of March. This is the general law, but under the Bateman act, passed by the last session of the legislature, the assessor is required to assess property separately in the limits of an incorporated city, town, school district or any other municipality, for the purpose of paying interest on bonds issued by such municipality under the other provisions of that act. That is, that only the property situated within the limits of the municipality which has issued bonds, shall be taxed to pay the interest on bonds issued by it.

W. H. H. LLEWELLYN.  
Member Bureau of Immigration.

MR. HARRY L. MILES, of Las Cruces, having removed from the territory and having tendered his resignation as a member of the bureau of immigration, Governor Otero has appointed Hon. W. H. H. Llewellyn, of Dona Ana county, to fill the vacancy. The selection is peculiarly appropriate and sagacious. Major Llewellyn has been a resident and citizen of the territory for 16 years and there is no man in the territory who is better known or who has done more for the upbuilding of its material

A GEORGIA paper sets up the following yawp: "Oh, for one hour of William Jennings Bryan in the presidential chair to teach haughty Spain her true place."

It is a mighty good thing that Mr. W. Jennings Bryan is not in the presidential chair, for were he there, this country would be in the financial and commercial dumps. Besides, while Mr. Bryan is a smart, rapid talker, it may seriously be doubted, if he could teach haughty Spain ever so little in an hour. In addition it may be remarked that it will take the army and navy of this country to teach "haughty Spain" that much needed lesson, and that the president, be he who he may, will remain quietly at home in Washington attending to the business of his great office. Yawps like the one quoted from this Georgia paper make people sleepy and that very early in the game.

## Valuable Time Wasted.

THE Spaniards have been successful in stopping the relief work among the reconcentrados, and until this country has made up its mind what it is going to do in the Cuban question, the miserable people of that island will continue to starve. The suspension of the feeding of the oppressed and needy was not accomplished by diplomacy, it was done by brute force and in defiance of the usages of humanity and Christianity.

TWO weeks ago citizens of Kansas City and vicinity loaded a vessel at New Orleans with 700 tons of food and sent it to Matanzas. The food was intended for the relief of the poor of that city and was sent to them without any expense whatever to the Spanish government. How was the cargo received? The men in charge were permitted to land the provisions and were then compelled to flee for their lives. In that flight they would have been unsuccessful had it not been for the efforts of Consul Brice, who succeeded in getting a few moments delay in the preparations making by the Spaniards of the place to murder the representatives of Kansas City.

MISS Clara Barton, of the Red Cross society, an organization that is recognized by every civilized nation in the world as entitled to immunity from all dangers of war and permitted to carry on its work everywhere without molestation, has been compelled to leave the island in order to escape personal insult and injury; the accredited representatives of this country have returned home for the same reason, and the unprotected women and children among the reconcentrados are left to the mercy of the most fiendish set of men on the face of the earth. Such is the present condition on the island of Cuba, and yet our representatives in congress waste valuable time in squabbling over the manner in which lives shall be saved.

IT is therefore not strange that the American people are daily growing more impatient. The great wonder is that there has not been such public demonstrations as would cause the men in congress to tremble for their future state. It has been acknowledged by the most hide-bound, peace-at-any-price men that the time to end the fearful state of affairs in Cuba has come, but in place of taking steps to that end the dignified senators must have time to make a medicine talk for the benefit of their constituents and hear the sound of their own voices. Delay, delay, is the song the money changers sing. In the face of known conditions they talk about a peaceable settlement. The Spaniards may be and are brutal, but they are also astute diplomats and every moment of the time gained in talking about an armistice, which everybody knows to be a farce and an impossibility, is taken advantage of by them in preparing for a war they recognize as inevitable.

resources than he. He is thoroughly conversant with the various leading interests of the territory, such as mining, cattle and sheep raising, fruit growing and agriculture generally, knows a great deal on the subjects of irrigation and land law, is a good writer and certainly understands how to advertise New Mexico favorably wherever he is. Major Llewellyn, from his great experience and knowledge of the territory, will prove a very valuable member of the bureau of immigration.

## The Klondike Boom.

Judging from all reports, the Klondike boom is in a state of collapse. The transportation companies which made great preparations to carry thousands of miners and greenhorns to the frozen land of gold are very much discouraged over the scant numbers who apply for and engage berths for Alaskan points. There is trouble somewhere and the companies are endeavoring to ascertain where the rabbit foot can be applied to do the most good.

The true inwardness of the situation lies in the fact that the returns from the Klondike have failed to come up to the expectations of the country. Last fall it was announced that the coming spring would bring \$25,000,000 in gold to the states from the northwest, and many persons have been waiting for this enormous wealth to materialize, before venturing upon the hazardous trip. So far but few thousands of dollars have come out of the mines in that inhospitable country since the first of the year, while on the other hand numerous discouraging reports have been sent out from the districts of that region. That there is gold up there no one doubts, but there are serious doubts about a quantity that will pay for the dangers of the trip. Of course the season is somewhat backward so far north and travel at this time of year over the passes and through the snow is not the easiest thing that can be undertaken, and the reason that more gold has not been received at the mints of the United States from Alaska, may be that it can not be transported from the interior to the coast. A month later may see a change in that respect. In that case there may be something of an exodus to the mines of the Northwest territory, but the enthusiasm over Klondike which prevailed last fall has, in a great measure died out, and it will take very substantial evidence to revive it again.

IN the meantime New Mexico is attracting more and more attention as a gold mining country, and men who had intended going north to seek their fortunes are coming into this territory and becoming interested in the camps here. In the long run, it is safe to say, they will be better off. Large sums of money are required to successfully hunt for gold in the Klondike region, to say nothing of the many hardships to be encountered, and the same money judiciously invested in New Mexico mining property will bring better returns without the danger of the prospector's or investor's bones whitening some lonely mountain pass.

When it comes to hunting for gold the odds are long in favor of New Mexico, and miners who bear that fact in mind will be the winners.

If there is a history of weak lungs in your family, take Scott's Emulsion.

It nourishes and invigorates.

It enables you to resist the disease. Even if your lungs are already affected, and if besides the cough you have fever and emaciation, there is still a strong probability of a cure.

The oil in the Emulsion feeds; the hypophosphites give power to the nerves; and the glycerine soothes and heals.

See and get on, all druggists. SCOTT & BOWNE, Chemists, New York.

## Proposals For Bids.

NEW MEXICO PENITENTIARY. Santa Fe, N. M., April 13th, 1898. Sealed proposals will be received by the board of New Mexico penitentiary commissioners, at the office of the superintendent, until 11 a. m., on May 3d, 1898, for furnishing and immediate delivery at the New Mexico penitentiary for all or any part of the hereinafter named and described supplies, required for the maintenance of the penitentiary for six months, or so much thereof as the board may deem sufficient.

Payment of supplies furnished will be made by non-interest bearing vouchers, issued upon the territorial auditor. Samples will be required of all the articles marked with an asterisk, and these should be labeled, showing name of the bidder, price, etc., and must be delivered to the superintendent of the penitentiary not later than 9 a. m. of that day.

A bond will be required from all successful bidders, for the faithful fulfillment of contracts, as soon as information to that effect reaches them.

The board of New Mexico penitentiary commissioners reserves the right to reject any and all bids, should it deem so advisable.

68,625 lbs. fresh beef, prime quality, necks and shanks excluded.  
\*51,000 lbs. flour, prime quality, "Blanca" preferred.

THE SEVENTH Beet Sugar factory in the United States was erected at Eddy, New Mexico, in 1896, and made its first "campaign," beginning November 15th, 1896, and closing February 15th, 1897.

THE CONTENT OF "SUGAR in the beet" of the crop grown in the Eddy and Roswell sections of the valley has proven to be more uniformly high than any other part of the United States.

FORTUNATELY the land is blessed with just the fertility to produce high grade beets, and

MORE FORTUNATELY the Pecos

Irrigation and Improvement Co. and the Roswell and Water Co. have an irrigation system of great magnitude, covering a vast body of the BEST SUGAR BEET lands on earth. The water is applied to the crop WHEN NEEDED.

THE SUN SHINES more hours in the day and more days in the year in Eddy and Chaves counties, New Mexico, than in any other section of the west.

Valley, General Agent, 1009 17th St. Denver.

194 separate analysis, chiefly carload lots, showed AN AVERAGE of 17.01 per cent sugar in beet; 84.1 per cent purity.

THIS REMARKABLE RESULT was accomplished by raw farmers, unacquainted with the culture of beet roots, on new land and under very trying circumstances, as the factory was not started until May, and a majority of the acreage was planted between JUNE 1st AND AUGUST 10th.

THE SUGAR BOWL OF THE GREAT SOUTHWEST Is the Rich Valley of the Rio Pecos. IN THE COUNTIES OF EDDY AND CHAVES OF NEW MEXICO.

GOOD SOIL makes the seed germinate.

WATER makes the plant grow.

SUNLIGHT puts the sugar in the BEET.

THE ONLY THING left to be desired that the Pecos Valley has not on hand in abundance is PEOPLE. We need thrifty farmers; 500 heads of families each on a 40-acre farm.

NO FAIRER terms or conditions of sale of beet and fruit lands were ever made.
